

Responsible Care®

Responsible Care® Ethic and Principles for Sustainability

We dedicate ourselves, our technology and our business practices to sustainability – the betterment of society, the environment and the economy. The Principles of Responsible Care are key to our business success and compel us to:

- Continually work for the improvement of people's lives and the environment, while striving to do no harm;
- Be accountable and responsive to the public, especially our local communities who have the right to understand the risks and benefits of what we do;
- Take preventive action to protect health and the environment;
- Innovate for safer products and processes that conserve resources, minimize waste and provide enhanced value;
- Engage with our business partners to ensure stewardship and security of our products, services and raw materials throughout their life-cycles;
- Understand and meet expectations for social responsibility;
- Work with all stakeholders for public policy and standards that enhance sustainability, act to advance legal requirements and meet or exceed their letter and spirit;
- Promote awareness of Responsible Care, at all levels, demonstrate visible leadership and inspire others to commit to these principles, throughout the chemistry product value chain.
